

ANKLE BRACES

COMPRESSIVE SLEEVE \$60-130

Provides warmth and proprioception and, in some cases, medical grade compression.

Indications:

- Ankle pain and/or swelling
- Achilles tendon pain and/or swelling

OTC FOOT DROP ORTHOSIS \$120-150

Designed to control foot drop by raising the foot after toe-off to reduce the risk of tripping

OTC options are flexible and will allow for some plantar flexion and dorsiflexion; more rigid options are available upon request.

Indications:

- Foot drop

WALKING CAST BOOT \$185

Designed to immobilize the foot and ankle. A heel wedge can be added inside the boot for Achilles tendon ruptures. Prevents plantar flexion and dorsiflexion, as well as inversion and eversion.

Indications:

- Ankle or foot fractures
- Achilles tendon ruptures or tendinopathy
- Grade II and III ankle sprains

FUNCTIONAL ANKLE BRACE \$60-200

Designed to prevent inversion and eversion. It can be worn during activity and may be used prophylactically in some sports, or worn while recovering from an injury.

Indications:

- Ankle inversion or eversion sprain
- Osteoarthritis of the sub-talar joint
- Re-introduction of activity after a major ankle injury
